Decent read, not a lot of new material here ...By Bamboo DanBasic plans covering a number of construction types, including floating decks using the molded concrete footings currently available. Good for the DIYer.2 of 3 people found the following review helpful. Invaluable bookBy A CustomerThis book was a lifesaver for my deck projects -- built two decks in my back yard. Looked through a couple of other books, but this one won hands down.

This is a how-to book on designing and building decks for homes.
